

Applications:

- Environmental management
- Composting
- Municipal
- Landscaping
- Site-preparation

Functions:

- Forest fuel reduction
- Trail and path maintenance
- Land clearing
- Mulching slash piles
- Roadside maintenance
- Riverbank renovation/maintenance
- Orchard pruning
- Habitat restoration
- Invasive vegetation management

Technical Description:

The **AHWI CEM36 Hydraulic Mulcher** is a heavy duty fixed tooth mulching attachment designed to fit a wide range of mid-sized excavators from 8 to 12 tonne. Built to exceed expectations for grinding capacity and durability, it is the perfect attachment for the full time mulching contractor or an excavator operator wishing to add profitable mulching capabilities to his machine.

Features:

- Fixed tool design allows for unmatched durability and performance.
- Low maintenance design
- Exceptional tool life
- Heavy duty rotor and body
- Variable displacement motor is adjustable to fit flow ranges of 8 – 12 tonne excavators

Technical Data:

Excavator Capacity	8 – 12 tonne
Weight with mount	544 kg
Overall width	1320 mm
Overall height with mount	988 mm
Rotor type	AHWI HDT fixed tool system
Rotor cutting width	915 mm
Rotor diameter	500 mm
No of tools	18
Variable displacement motor	68 – 114 L/min

FOUR tool choices to match your grinding requirements

Double carbide

Stone tool

Single carbide

Chipper knife
