

# EC1400 Bio Chipper

## Applications:

- Woodchip production
- Biomass energy recovery
- Waste management
- Composting

## Functions:

- Chipping logs up to 1000 mm in diameter

## Technical Description:

Can be fitted to a tandem trailer, on a truck chassis or a crawler unit. 900 mm chipper drum, driven by a diesel engine up to 300 - 500 kW.

Logs are picked up by a grapple fitted to the unit, and delivered to the feed bed. A heavy duty blower with adjustable supercharger delivers chipped material to a stockpile or waiting truck.

### Technical Data:

Model	EC950
Engine power	500 kW Volvo diesel
Chipper drum diameter	1400 mm
Feeder bed	1120 mm wide x 1050 mm high
Feeder drive	hydraulic, infinitely adjustable
Stump diameter (max.)	1000 mm
Conveyor	Active steel plate, hydraulically driven, tiltable
Chip discharge	Screw conveyor
Blower	Heavy duty with adjustable supercharger, hydraulically pivoting tube
