

# FM400H Hydraulic Mulcher

## Applications:

- Land clearing
- Roadside clearing
- Site preparation
- Composting

## Functions:

- Grinding bushes and branches
- Grinding standing trees to ground level
- Stump grinding (5–10 cm in soil).

## Technical Description:

The **AHWI FM400H Hydraulic Mulcher** head is an attachment for excavators from 12 to 16 tonnes, depending on the hydraulic power available.

The oil motor is integrated in and protected by the housing of the mulcher. The rotor is tipped with 30 hard wearing tungsten carbide tools, each individually replaceable.

## Options:

Hydraulic motor and drive matched to suit excavator, mounting plate to suit excavator, hydraulic protection valve, electrical solenoid valve for operation of flap.

### Technical Data:

Rotor diameter	400 mm
Working width	1200 mm
Weight	750 kg
Driving speed	2000 – 2500 rev/min
Hydraulic flow rate	90 – 140 l/min @ 200–400 bar 24 – 37 USgal/min @ 2900–5800 psi

### FOUR tool choices to match your grinding requirements

Double carbide

Stone tool

Single carbide

Chipper knife
