

## Applications:

- Forestry
- Landscaping
- Municipal
- Site preparation
- Composting

## Functions:

- Slash reduction
- Recreating trails
- Land clearing
- Reducing thin timber stands
- Mulching slash piles
- Brush cutting
- Orchard pruning
- Tree removal
- Pasture restoration
- Eradicating undesirable vegetation.

## Technical Description:

The **AHWI FM500 Forestry Mulcher** is an attachment for tractors with three point linkage and PTO drive. The main gearbox divides the power to both sides of the power belt driven rotor. The rotor is tipped with fixed carbide hammers, which are easily and individually replaceable. A hydraulic operated follow-up and protection flap provides excellent after-grinding.

## Accessories:

Hydraulic or fixed push-bar and hydraulic top-link, third counter blade with wearing teeth, skids for working deeper in the soil, torque safety.

## Options:

Power up to 180 hp, synchronization control for gearbox, rotor drive hydraulically or with mounted engine, different working widths and rotor models available.

## Technical Data:

PTO Power	75–112 kW	100–150 hp
Tractor Power	82–127 kW	110–170 hp
Working width standard	2300 mm	
Drive speed	1000 rev/min	
Overall width	2660 mm	
Rotor diameter	500 mm	
Weight	1900 kg	

## FOUR tool choices to match your grinding requirements

Double carbide

Stone tool

Single carbide

Chipper knife
