

Applications:

- Land clearing
- Roadside clearing
- Site preparation
- Composting

Functions:

- Grinding bushes and branches
- Grinding standing trees to ground level
- Stump grinding (5–10 cm in soil).

Technical Description:

The **AHWI FM500H Hydraulic Mulcher** head is an attachment for excavators from 16 – 22 tonnes, depending on the hydraulic power available.

The oil motors are integrated in and protected by the housing of the mulcher. The rotor is driven on one side by a reinforced power belt and fitted with tungsten carbide cutting tools, each individually replaceable

Options:

Hydraulic motor and drive matched to suit excavator, mounting plate to suit excavator, hydraulic protection valve, electrical solenoid valve for operation of flap.

Technical Data:

Rotor diameter	500 mm
Working width	1100 mm
Weight	1400 kg
Driving speed	1800 rev/min
Hydraulic flow rate	150-240 l/min @ 200–400 bar 40-63 USgal/min @ 2900–5800 psi

FOUR tool choices to match your grinding requirements

Double carbide

Stone tool

Single carbide

Chipper knife
