

# M450 Mulcher

## Applications:

- Landscaping
- Farming
- Municipal
- Site preparation
- Composting

## Functions:

- Slash reduction
- Recreating trails
- Reducing thin timber stands
- Mulching slash piles
- Brush cutting
- Orchard pruning
- Pasture restoration
- Eradicating undesirable vegetation.

## Technical Description:

The **AHWI M450 Mulcher** is an attachment for smaller tractors with three point linkage and PTO drive. The 1800 mm width and 450 mm diameter rotor enables excellent mulching performance from modest power input. The main gearbox divides the power to both sides of the power belt driven rotor. The rotor is fitted with HDT tools, which are easily and individually replaceable. A hydraulic operated follow-up and protection flap provides excellent after-grinding. Improved counter blade design results in more efficient mulching with less power.

## Accessories:

Fixed push-bar, hydraulic top-link, height adjustable skids.

## Options:

Hydraulically operated push bar, range of interchangeable HDT tools for different applications.

## Technical Data:

PTO Power	60–97 kW	80–130 hp
Tractor Power	67–104 kW	90–140 hp
Working width standard	1800 mm	
Drive speed	1000 rev/min	
Rotor speed standard	1920 rev/min	
Overall width	2110 mm	
Rotor diameter	450 mm	
Weight	1350 kg	

## FOUR tool choices to match your grinding requirements

Double carbide

Stone tool

Single carbide

Chipper knife
