

Applications:

- Forestry
- Plantations
- Infrastructure
- Land clearance
- Energy line cultivation

Functions:

Used with a range of attachments for:

- Slash reduction
- Tree stump cutting
- Powerline clearing
- Commercial land clearing
- Grinding standing trees and stumps
- Recreating trails
- Clearing seismic lines
- Commercial grinding in plantations
- Soil preparation for new growth.

Technical Description:

The **AHWI RT400 Crawler Tractor** is a specialist carrier for land preparation in the forestry, construction and agriculture industries, with a wide spectrum of applications. Hydrostatic drive with infinitely variable transmission from 0 – 7 km/h allows for precise working. The RT400 is fitted with a heavy duty 3-point linkage for attachments such as mulchers and stump grinders.

The PTO drive offers the ability to change attachments quickly and simply. Power transmission is provided mechanically by a heavy duty PTO shaft and protected by a turbo fluid clutch. The turbo clutch guarantees a long life for all the components of the drive and allows the use of full engine power to the attachment.

Options:

Grouser pads available in different widths and configurations.

Technical Data:

Engine type	Deutz BF6M1015CP
Engine power	300 kW 402 hp
Max. drive speed	7 km/h
Heavy duty undercarriage	Cat® D5
Grouser shoe width	600 mm
Ground pressure (incl. mulcher) approx.	0.53 kg/cm ²
Inclination	up to 45°
Total width	2750 mm
Total height	3200 mm
Total length	4960 mm
Total weight (without mulcher)	15000 kg
(with mulcher) approx.	19800 kg
