

Applications:

- Forestry
- Tree nurseries
- Landscaping
- Plantations
- Site preparation

Functions:

- Economic and efficient grinding of all types of stumps
- Grinding stump rows
- Stump grinding in orchards, parks and gardens.

Technical Description:

The **AHWI SF900 Stump Grinder** is a PTO-driven attachment with Cat II and III three-point linkage. It can be mounted on a range of machines with the appropriate power rating and linkage configurations.

The SF900 excels by its robust, solid and compact design and its large operating range. The SF900 stump grinder is handled by cable remote control.

The grinding wheel is driven by a drive shaft, gearbox and power belts on both sides of the unit and is equipped with eight wearing plates and eight chisel tools, all of which are carbide-tipped. This combination allows lateral grinding as well as a radial cut of the stump.

All tools are easy to replace.

Technical Data:

Tractor power	56–112 kW	75–150 hp
Drive speed PTO	1000 rev/min	
Operating range	2100 mm	
Total width	1400 mm	
Total working width	1900 mm	
Weight	approx. 1300 kg
